HEALTH & SAFETY

We recognize that health and safety is an integral and fundamental component of our business. Laois scaffolding divisions are ably overseen by our experienced Safety Officer, Michael Murphy who propagates a strong safety culture amongst management and staff.

- Winners of ConstructSecure safety award 2020.
- H&S Trained Staff: on-going safety training led by Safety Officer Michael Murphy.
- Top quality, revolutionary design materials and services (Layher systems, Catch fan system, Inspect7®).
- Members of CIF and NASAC & members of CIF Safety Committee.
- Safe T Certified and in the process of preparing for ISO 9001 Certification.

LAOIS SERVICES

All our services are carried out in full compliance with the 2019 HSA code of practice, regulations and health and safety legislation.

- Immediate assessment of premises and job quotation.
- Highly experienced management team and skilled employees.
- Qualified safety advisers and full H&S compliance.
- Top quality, safe, durable materials, and systems.
- Innovative Design Services.
- Prompt delivery and collection of materials.
- Efficient, safe, and professional erecting and dismantling.
- Budget monitoring and cost control services.

DESIGN SERVICES

We have the equipment and expertise to develop safe solutions for any access obstacles.

- On-site discussions of scaffolding/temporary works design requirements.
- Professional tender and construction drawings produced with computer aided design software customised for scaffolding.
- Quick turnaround of drawings.
- Site visits to ensure that works comply with our design and completion certificate provided.

LAYER SCAFFOLDING SYSTEMS

We provide Layher scaffolding systems which are revolutionary in design and functions, renowned globally for quality, safety, and efficiency.

- Stronger, lighter, and easier to assemble.
- Higher bending and load bearing capacity.
- Parts that enable higher connection values and suspended scaffolding.
- Optimum transmission of forces at the standard joints.
- Increased safety and more head room.

INSPECT7®

Laois Scaffolding Hire Ltd. are the very first in Ireland to avail of the new digital tagging system Inspect7®, which has revolutionised health and safety inspections and reporting.

Inspect7® is an award-winning paperless tracking system that is monitored and updated by Laois Supervisors and can be shared with clients to maximise safety and manage projects and timelines.

RESIDENTIAL

CAIRN, CITY WEST

Category: Residential/New build
Date: 2018-2020
Client: Cairn Homes
Location: Dublin, Ireland

We provide scaffolding and access services for a range of housing projects from one-off housing units and low-density housing estates to large scale, high-density residential and commercial developments nationwide including new-build, restoration, and maintenance works with a dedicated team for one-off housing projects.

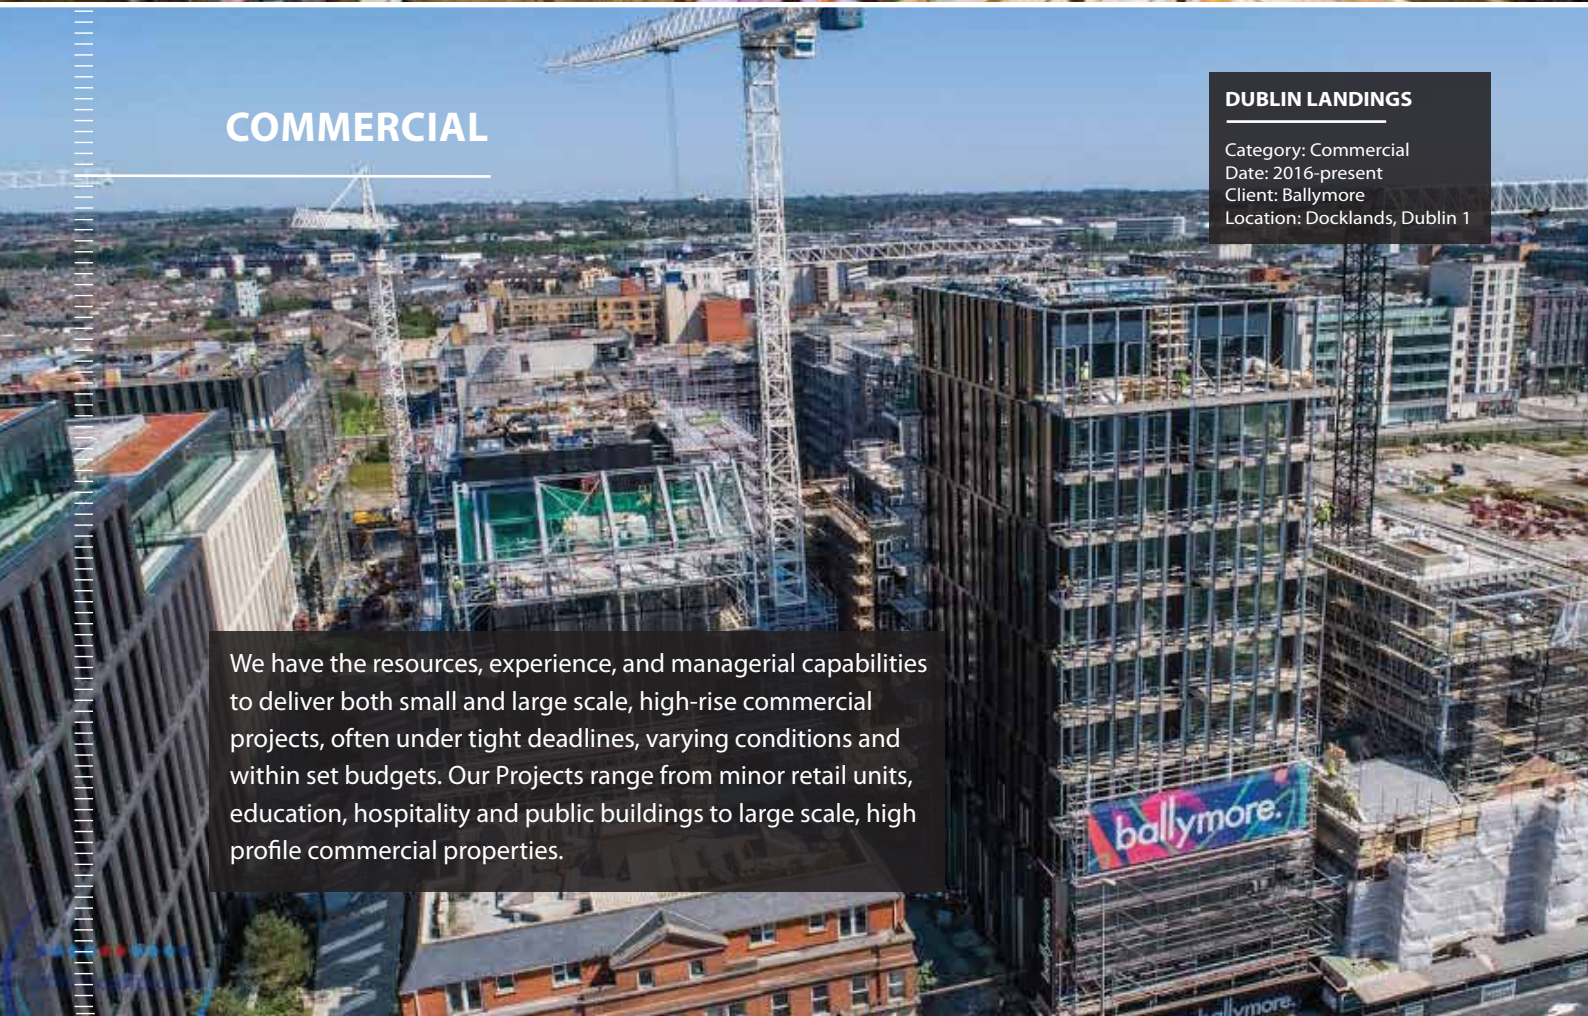

COMMERCIAL

DUBLIN LANDINGS

Category: Commercial
Date: 2016-present
Client: Ballymore
Location: Docklands, Dublin 1

We have the resources, experience, and managerial capabilities to deliver both small and large scale, high-rise commercial projects, often under tight deadlines, varying conditions and within set budgets. Our Projects range from minor retail units, education, hospitality and public buildings to large scale, high profile commercial properties.

INDUSTRIAL

ALEXION PHARMACEUTICAL

Category: Industrial Pharmaceutical
Date: 2015-2016
Client: PM Group
Location: Blanchardstown, Co. Dublin

We provide innovative scaffolding solutions designed to the unique specifications of often challenging industrial and pharmaceutical properties. We are experienced in providing, designing, and erecting complex scaffolding structures with great height and depth for complex industrial operating environments including restoration and maintenance works.

RESTORATION & MAINTENANCE

JEANIE JOHNSON

Category: Restoration & Maintenance
Date: Sept 2019-Dec 2019
Client: Dublin City Council
Location: IFSC North Docklands

We provide specialised scaffolding and access structures for conservation, restoration, and maintenance projects with the expertise to develop solutions for any access obstacles. Projects range from high profile commercial units, lift restorations and Irish Rail train stations to the restoration and repair of delicate and dangerous structures including castles, ships, churches, and old bridges.
